ELSEVIER

Thin Solid Films 368 (2000) 321–326

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 368

Alloys
Magnetic and magneto-optical properties of DC-sputtered $(CoPt_3)_{1-x}Ni_x$ (x=0–0.5) alloy films, 138
Aluminum nitride
The optical and structural properties of AlN thin films characterized by spectroscopic ellipsometry, 67
Aluminum oxide
Effect of water dose on the atomic layer deposition rate of oxide thin films, 1
Characterization of amorphous aluminum oxide films prepared by the pyrosol process, 74
Ammonia
Influence of the surface polarity of dye-doped sol–gel glass films on optical ammonia sensor response, 105
Amorphous hydrogenated carbon
Characterization of elastic properties of hard carbon and boron nitride films using the Brillouin light scattering technique, 216
Amorphous materials
Correlation of the optical gap of $(Ba,Sr)_yTiO_{2-y}$ thin films with film composition, 41
Annealing
Dependence of texture development on thickness of single-annealed-layer in sol–gel derived PZT thin films, 22
Antireflective
CVD diamond thin film for IR optics and X-ray optics, 297
Argon gas
Enhanced diamond film growth by Xe-added microwave plasma CVD, 269
Atomic force microscopy
Aerosol–gel deposition of doped titania thin films, 35
Influences of initial buffer layer deposition on electrical and optical properties in cubic GaN grown on GaAs(100) by metalorganic chemical vapor deposition, 279
Atomic layer deposition
Effect of water dose on the atomic layer deposition rate of oxide thin films, 1

Bond strength
Influence of oxide mixtures on mechanical properties of plasma sprayed functionally graded coating, 86
Boron
Low temperature doping of poly-SiGe films with boron by co-sputtering, 55
Boron nitride
Characterization of elastic properties of hard carbon and boron nitride films using the Brillouin light scattering technique, 216
Formation of cubic boron nitride films on nickel substrates, 292

c-BN
The growth of cubic boron nitride films by RF reactive sputter, 312
h-BN
The growth of cubic boron nitride films by RF reactive sputter, 312
Boron nitride films
The growth of cubic boron nitride films by RF reactive sputter, 312
c-BN films
Microstructure and semiconducting properties of c-BN films using r.f. plasma CVD thermally assisted by a tungsten filament, 283
Brillouin light scattering
Characterization of elastic properties of hard carbon and boron nitride films using the Brillouin light scattering technique, 216
Buffer layer
Influences of initial buffer layer deposition on electrical and optical properties in cubic GaN grown on GaAs(100) by metalorganic chemical vapor deposition, 279
Buried SiC layers
Structure characteristic of buried SiC layers, 241

Capacitance–voltage
Characterization of CeO_2 thin films as insulator of metal ferroelectric insulator semiconductor (MFIS) structures, 61
Carbon
Chemical vapor deposition of novel carbon materials, 193
CeO_2
Characterization of CeO_2 thin films as insulator of metal ferroelectric insulator semiconductor (MFIS) structures, 61
CH_3 radicals
Enhanced diamond film growth by Xe-added microwave plasma CVD, 269
Resonance enhanced multiphoton ionization probing of H atoms and CH_3 radicals in a hot filament chemical vapour deposition reactor, 169
Chemical vapor deposition
Deposition of a-SiC:H thin film from organosilicon material by remote plasma CVD method, 181
Chemical vapor deposition of novel carbon materials, 193
Effects at reactive ion etching of CVD diamond, 222
Development of diamond synthesis techniques at low pressures, 231
Projective phase diagrams for CVD diamond growth from C–H and C–H–O systems, 253
Comparison of deposition behavior of $Pb(Zr,Ti)O_3$ films and its end-member-oxide films prepared by MOCVD, 261

PII: S0040-6090(00)00965-2

Thermodynamics analyses of the effect of CH_3 and C_2H_2 on morphology of CVD diamond films, 266
Aerosol and plasma assisted chemical vapor deposition process for multi-component oxide $La_{0.8}Sr_{0.2}MnO_3$ thin film, 275
Experiments and analyses of SiC thin film deposition from organo-silicon by a remote plasma method, 287
CVD diamond thin film for IR optics and X-ray optics, 297
Two-step growth of high quality diamond films, 303
Raman study on residual strains in thin 3C-SiC epitaxial layers grown on Si(001), 307
Chemical vapour deposition modelling
Rates of reactions of H atoms with some CVD precursors, 176
ClAlPcCl
Photoconductive properties of ClAlPcCl and ClInPc composite thin film prepared by physical vapor deposition approach, 300
ClInPc
Photoconductive properties of ClAlPcCl and ClInPc composite thin film prepared by physical vapor deposition approach, 300
Combustion
Investigations of the gas phase mechanism of diamond deposition in combustion CVD, 185
Composition control
Comparison of deposition behavior of $Pb(Zr,Ti)O_3$ films and its end-member-oxide films prepared by MOCVD, 261
Computer simulations
Critical dimensions for the formation of interfacial misfit dislocations of $In_{0.6}Ga_{0.4}As$ islands on GaAs(001), 93
Corrosion
Mechanical properties and corrosion studies of amorphous carbon on magnetic disks prepared by ECR plasma technique, 198
Crystallization
Low temperature doping of poly-SiGe films with boron by co-sputtering, 55
Cubic GaN
The content calculation of hexagonal phase inclusions in cubic GaN films on GaAs(001) substrates grown by metalorganic chemical vapor deposition, 237
Influences of initial buffer layer deposition on electrical and optical properties in cubic GaN grown on GaAs(100) by metalorganic chemical vapor deposition, 279
Cycloaddition
Stable monolayers and Langmuir–Blodgett Films of a new crown ether-bearing [60]fulleropyrrolidine containing benzothiazolium styryl dye, 147

DC active N_2 plasma
Epitaxial growth of GaNAs/GaAs heterostructure materials, 249
Deposition mechanism
Comparison of deposition behavior of $Pb(Zr,Ti)O_3$ films and its end-member-oxide films prepared by MOCVD, 261
Deposition process
Aerosol–gel deposition of doped titania thin films, 35
Deposition and structural characterization of high quality textured C_{60} thin films, 49
Development of diamond synthesis techniques at low pressures, 231
Diamond
Chemical vapor deposition of novel carbon materials, 193
Effects of fluorine addition on driving force for CVD diamond growth, 208
Effects at reactive ion etching of CVD diamond, 222
Development of diamond synthesis techniques at low pressures, 231
Projective phase diagrams for CVD diamond growth from C–H and C–H–O systems, 253
CVD diamond thin film for IR optics and X-ray optics, 297
Diamond chemical vapour deposition
Resonance enhanced multiphoton ionization probing of H atoms and CH_3 radicals in a hot filament chemical vapour deposition reactor, 169
Investigations of the gas phase mechanism of diamond deposition in combustion CVD, 185
Diamond films
Study of diamond film growth mechanism on porous silicon during hot-filament chemical vapor deposition, 211
Thermodynamics analyses of the effect of CH_3 and C_2H_2 on morphology of CVD diamond films, 266
Two-step growth of high quality diamond films, 303
Diamond thin film Field effect transistor
Enhanced diamond film growth by Xe-added microwave plasma CVD, 269
Diamond-like carbon
Mechanical properties and corrosion studies of amorphous carbon on magnetic disks prepared by ECR plasma technique, 198
Diamond-like carbon films
Electrodeposition diamond-like carbon films from organic liquids, 203
Dielectrics
Correlation of the optical gap of $(Ba,Sr)_yTiO_{2+y}$ thin films with film composition, 41
Characterization of amorphous aluminum oxide films prepared by the pyrosol process, 74
Distribution
Structure characteristic of buried SiC layers, 241
Doped titanium oxide
Aerosol–gel deposition of doped titania thin films, 35
Driving force
Effects of fluorine addition on driving force for CVD diamond growth, 208

Elastic properties
Characterization of elastic properties of hard carbon and boron nitride films using the Brillouin light scattering technique, 216
Electrical properties and measurement
Microstructure of indium oxide films in oxygen ion-assisted deposition, 111
Electrochemical deposition
Electrodeposition diamond-like carbon films from organic liquids, 203
Electron cyclotron resonance
Mechanical properties and corrosion studies of amorphous car-

bon on magnetic disks prepared by ECR plasma technique, 198
Epitaxy
Microstructure and growth modes of stoichiometric NiAl and Ni_3Al thin films deposited by r.f.-magnetron sputtering, 26
Excitons
Dissociation of excitons in organic dye layers of perylene derivatives, 130
Experimental methods
Characterization of elastic properties of hard carbon and boron nitride films using the Brillouin light scattering technique, 216
External electric field
Controlling and improving the microtribological properties of Langmuir–Blodgett monolayer films using an external electric field, 151

Ferroelectric properties
Dependence of texture development on thickness of single-annealed-layer in sol–gel derived PZT thin films, 22
Film
CVD diamond thin film for IR optics and X-ray optics, 297
Flash photolysis
Rates of reactions of H atoms with some CVD precursors, 176
Fluorine
Effects of fluorine addition on driving force for CVD diamond growth, 208
Fourier transform infrared spectroscopy
The influence of the momentum transfer on the structural and optical properties of ZnSe thin films prepared by r.f. magnetron sputtering, 8
Aerosol–gel deposition of doped titania thin films, 35
Deposition of a-SiC:H thin film from organosilicon material by remote plasma CVD method, 181
Experiments and analyses of SiC thin film deposition from organo-silicon by a remote plasma method, 287
Formation of cubic boron nitride films on nickel substrates, 292
Fourier transform infrared spectroscopy of intensity
Epitaxial growth of GaNAs/GaAs heterostructure materials, 249
Friction
Controlling and improving the microtribological properties of Langmuir–Blodgett monolayer films using an external electric field, 151
Fullerenes
Deposition and structural characterization of high quality textured C_{60} thin films, 49
Fulleropyrrolidine
Stable monolayers and Langmuir–Blodgett Films of a new crown ether-bearing [60]fulleropyrrolidine containing benzothiazolium styryl dye, 147

GaNAs
Epitaxial growth of GaNAs/GaAs heterostructure materials, 249
Growth mechanisms
Stress relaxation in c_2–c_1 YBaCuO thin films on MgO substrate studied by LACBED, 142

H atoms
Resonance enhanced multiphoton ionization probing of H atoms and CH_3 radicals in a hot filament chemical vapour deposition reactor, 169
H atom reactions
Rates of reactions of H atoms with some CVD precursors, 176
Hexagonal phase content
The content calculation of hexagonal phase inclusions in cubic GaN films on GaAs(001) substrates grown by metalorganic chemical vapor deposition, 237
Hollow cathode plasma
ZnSe growth by radical assisted MOCVD using hollow cathode plasma, 244
Hot-filament chemical vapor deposition
Study of diamond film growth mechanism on porous silicon during hot-filament chemical vapor deposition, 211

Indium oxide
Microstructure of indium oxide films in oxygen ion-assisted deposition, 111
Infrared spectroscopy
The preparation of nanosized silicon by laser-induced chemical vapour deposition, 315
Insulators
Characterization of amorphous aluminum oxide films prepared by the pyrosol process, 74
Interfaces
Heat resistance of electron beam deposited Mo/C X-ray multilayers, 80
Thin film PV module, 125
Interface trap density
Characterization of CeO_2 thin films as insulator of metal ferroelectric insulator semiconductor (MFIS) structures, 61
Ion beam assisted deposition
Reactive ion beam assisted deposition of a titanium dioxide film on a transparent polyester sheet, 257
Ion bombardment
Microstructure of indium oxide films in oxygen ion-assisted deposition, 111
IR optics
CVD diamond thin film for IR optics and X-ray optics, 297

Kinetic data
Rates of reactions of H atoms with some CVD precursors, 176

$La_{0.8}Sr_{0.2}MnO_3$ films
Aerosol and plasma assisted chemical vapor deposition process for multi-component oxide $La_{0.8}Sr_{0.2}MnO_3$ thin film, 275
Langmuir
Stable monolayers and Langmuir–Blodgett Films of a new crown ether-bearing [60]fulleropyrrolidine containing benzothiazolium styryl dye, 147
Langmuir–Blodgett films
Controlling and improving the microtribological properties of Langmuir–Blodgett monolayer films using an external electric field, 151
Laser ablation plume
Preparation of $SrRuO_3$ thin film by chemical reactive pulsed laser deposition, 227

Laser irradiation
Calculation of the temperature field induced in a sample by laser illuminated STM-probe, 156
Laser probing
Resonance enhanced multiphoton ionization probing of H atoms and CH_3 radicals in a hot filament chemical vapour deposition reactor, 169
Laser spectroscopy
Investigations of the gas phase mechanism of diamond deposition in combustion CVD, 185
Laser-induced chemical vapour deposition
The preparation of nanosized silicon by laser-induced chemical vapour deposition, 315
Light scattering
Thin film PV module, 125
Luminescence
Dissociation of excitons in organic dye layers of perylene derivatives, 130

Magnetic
Magnetic and magneto-optical properties of DC-sputtered $(CoPt_3)_{1-x}Ni_x$ (x=0–0.5) alloy films, 138
Magneto-optical
Magnetic and magneto-optical properties of DC-sputtered $(CoPt_3)_{1-x}Ni_x$ (x=0–0.5) alloy films, 138
Magnetron sputtering
Formation of cubic boron nitride films on nickel substrates, 292
Mass spectrometry
Investigations of the gas phase mechanism of diamond deposition in combustion CVD, 185
Metal organic chemical vapor deposition
The content calculation of hexagonal phase inclusions in cubic GaN films on GaAs(001) substrates grown by metalorganic chemical vapor deposition, 237
ZnSe growth by radical assisted MOCVD using hollow cathode plasma, 244
Microtribology
Controlling and improving the microtribological properties of Langmuir–Blodgett monolayer films using an external electric field, 151
Microwave plasma
Aerosol and plasma assisted chemical vapor deposition process for multi-component oxide $La_{0.8}Sr_{0.2}MnO_3$ thin film, 275
Microwave plasma chemical vapor deposition
Enhanced diamond film growth by Xe-added microwave plasma CVD, 269
Modeling
Investigations of the gas phase mechanism of diamond deposition in combustion CVD, 185
Molecular beam epitaxy
Epitaxial orientation of MBE grown Ru_2Si_3 films on Si(111) and Si(001), 15
Critical dimensions for the formation of interfacial misfit dislocations of $In_{0.6}Ga_{0.4}As$ islands on GaAs(001), 93
Epitaxial growth of GaNAs/GaAs heterostructure materials, 249
Monolayers
Stable monolayers and Langmuir–Blodgett Films of a new crown ether-bearing [60]fulleropyrrolidine containing benzothiazolium styryl dye, 147
Multilayers
Heat resistance of electron beam deposited Mo/C X-ray multilayers, 80

Nanosized silicon powder
The preparation of nanosized silicon by laser-induced chemical vapour deposition, 315
Nanostructures
Critical dimensions for the formation of interfacial misfit dislocations of $In_{0.6}Ga_{0.4}As$ islands on GaAs(001), 93
Calculation of the temperature field induced in a sample by laser illuminated STM-probe, 156
Near-infrared
CVD diamond thin film for IR optics and X-ray optics, 297
Nickel
Formation of cubic boron nitride films on nickel substrates, 292
Nitrogen
Mechanical properties and corrosion studies of amorphous carbon on magnetic disks prepared by ECR plasma technique, 198
Nitrogen content
Epitaxial growth of GaNAs/GaAs heterostructure materials, 249
Non-equilibrium thermodynamics
Effects of fluorine addition on driving force for CVD diamond growth, 208
Projective phase diagrams for CVD diamond growth from C–H and C–H–O systems, 253
Nucleation
Dependence of texture development on thickness of single-annealed-layer in sol–gel derived PZT thin films, 22

Optical properties
Correlation of the optical gap of $(Ba,Sr)_xTiO_{2+y}$ thin films with film composition, 41
Structural and optical properties of TiO_2 thin film and TiO_2+2 wt.% $ZnFe_2O_4$ composite film prepared by r.f. sputtering, 163
Reactive ion beam assisted deposition of a titanium dioxide film on a transparent polyester sheet, 257
Optical spectroscopy
Correlation of the optical gap of $(Ba,Sr)_xTiO_{2+y}$ thin films with film composition, 41
Influence of the surface polarity of dye-doped sol–gel glass films on optical ammonia sensor response, 105
Optical coatings
Scandia optical coatings for application at 351 nm, 116
Organic liquids
Electrodeposition diamond-like carbon films from organic liquids, 203
Organic semiconductors
Dissociation of excitons in organic dye layers of perylene derivatives, 130
Oxidation
Influence of oxide mixtures on mechanical properties of plasma sprayed functionally graded coating, 86
Oxides
Effect of water dose on the atomic layer deposition rate of oxide thin films, 1

Correlation of the optical gap of $(Ba,Sr)_xTiO_{2+y}$ thin films with film composition, 41

$Pb(Zr,Ti)O_3$
Comparison of deposition behavior of $Pb(Zr,Ti)O_3$ films and its end-member-oxide films prepared by MOCVD, 261
Perylene derivatives
Dissociation of excitons in organic dye layers of perylene derivatives, 130
Phase diagram
Projective phase diagrams for CVD diamond growth from C–H and C–H–O systems, 253
Phase transitions
Deposition and structural characterization of high quality textured C_{60} thin films, 49
Photoconductivity
Photoconductive properties of ClAlPcCl and ClInPc composite thin film prepared by physical vapor deposition approach, 300
Physical vapor deposition
Microstructure and growth modes of stoichiometric NiAl and Ni_3Al thin films deposited by r.f.-magnetron sputtering, 26
Development of diamond synthesis techniques at low pressures, 231
Photoconductive properties of ClAlPcCl and ClInPc composite thin film prepared by physical vapor deposition approach, 300
Plasma chemical vapor deposition
Microstructure and semiconducting properties of c-BN films using r.f. plasma CVD thermally assisted by a tungsten filament, 283
Plasma process
Enhanced diamond film growth by Xe-added microwave plasma CVD, 269
Plasma spray
Influence of oxide mixtures on mechanical properties of plasma sprayed functionally graded coating, 86
Porous silicon
Thin film PV module, 125
Study of diamond film growth mechanism on porous silicon during hot-filament chemical vapor deposition, 211
Pulsed laser deposition
Preparation of $SrRuO_3$ thin film by chemical reactive pulsed laser deposition, 227
Pyrolysis
Characterization of amorphous aluminum oxide films prepared by the pyrosol process, 74

Raman spectroscopy
Effects at reactive ion etching of CVD diamond, 222
Raman spectrum
Electrodeposition diamond-like carbon films from organic liquids, 203
Raman study on residual strains in thin 3C-SiC epitaxial layers grown on Si(001), 307
Reaction mechanism
Investigations of the gas phase mechanism of diamond deposition in combustion CVD, 185
Reflection high-energy electron diffraction
Influences of initial buffer layer deposition on electrical and optical properties in cubic GaN grown on GaAs(100) by metalorganic chemical vapor deposition, 279
Refractive index
The optical and structural properties of AlN thin films characterized by spectroscopic ellipsometry, 67
RF sputter
The growth of cubic boron nitride films by RF reactive sputter, 312
RF sputtering
The influence of the momentum transfer on the structural and optical properties of ZnSe thin films prepared by r.f. magnetron sputtering, 8
Ruthenium
Epitaxial orientation of MBE grown Ru_2Si_3 films on Si(111) and Si(001), 15

Scandium
Scandia optical coatings for application at 351 nm, 116
Scanning electron microscopy
Calculation of the temperature field induced in a sample by laser illuminated STM-probe, 156
Chemical vapor deposition of novel carbon materials, 193
Semiconducting properties
Microstructure and semiconducting properties of c-BN films using r.f. plasma CVD thermally assisted by a tungsten filament, 283
Sensors
Influence of the surface polarity of dye-doped sol–gel glass films on optical ammonia sensor response, 105
SiC
Experiments and analyses of SiC thin film deposition from organo-silicon by a remote plasma method, 287
a-SiC
Structure characteristic of buried SiC layers, 241
β-SiC
Structure characteristic of buried SiC layers, 241
Silicides
Epitaxial orientation of MBE grown Ru_2Si_3 films on Si(111) and Si(001), 15
Silicon-germanium
Low temperature doping of poly-SiGe films with boron by co-sputtering, 55
Sol–gel
Scandia optical coatings for application at 351 nm, 116
Sol–gel glass
Influence of the surface polarity of dye-doped sol–gel glass films on optical ammonia sensor response, 105
Solar cells
Thin film PV module, 125
Spectroscopic ellipsometry
The optical and structural properties of AlN thin films characterized by spectroscopic ellipsometry, 67
Sputtering
Low temperature doping of poly-SiGe films with boron by co-sputtering, 55
The optical and structural properties of AlN thin films characterized by spectroscopic ellipsometry, 67
Structural and optical properties of TiO_2 thin film and TiO_2+2 wt.% $ZnFe_2O_4$ composite film prepared by r.f. sputtering, 163

$SrRuO_3$ thin film
Preparation of $SrRuO_3$ thin film by chemical reactive pulsed laser deposition, 227
Stress
Characterization of CeO_2 thin films as insulator of metal ferroelectric insulator semiconductor (MFIS) structures, 61
Stress relaxation in $c_\perp$–$c_{//}$ YBaCuO thin films on MgO substrate studied by LACBED, 142
Microstructure and semiconducting properties of c-BN films using r.f. plasma CVD thermally assisted by a tungsten filament, 283
Structural properties
Structural and optical properties of TiO_2 thin film and TiO_2+2 wt.% $ZnFe_2O_4$ composite film prepared by r.f. sputtering, 163
Superconductivity
Stress relaxation in $c_\perp$–$c_{//}$ YBaCuO thin films on MgO substrate studied by LACBED, 142
Surface acoustic waves
Characterization of elastic properties of hard carbon and boron nitride films using the Brillouin light scattering technique, 216
Surface morphology
Microstructure of indium oxide films in oxygen ion-assisted deposition, 111

Thermal barrier coating
Influence of oxide mixtures on mechanical properties of plasma sprayed functionally graded coating, 86
Thermodynamics
Thermodynamics analyses of the effect of CH_3 and C_2H_2 on morphology of CVD diamond films, 266
Thin film
Deposition of a-SiC:H thin film from organosilicon material by remote plasma CVD method, 181
Raman study on residual strains in thin 3C-SiC epitaxial layers grown on Si(001), 307
Titania
Reactive ion beam assisted deposition of a titanium dioxide film on a transparent polyester sheet, 257
Titanium oxide
Aerosol–gel deposition of doped titania thin films, 35
Structural and optical properties of TiO_2 thin film and TiO_2+2 wt.% $ZnFe_2O_4$ composite film prepared by r.f. sputtering, 163
Transmission electron microscopy
Microstructure and growth modes of stoichiometric NiAl and Ni_3Al thin films deposited by r.f.-magnetron sputtering, 26
Critical dimensions for the formation of interfacial misfit dislocations of $In_{0.6}Ga_{0.4}As$ islands on GaAs(001), 93
Stress relaxation in $c_\perp$–$c_{//}$ YBaCuO thin films on MgO substrate studied by LACBED, 142
Two-step growth
Two-step growth of high quality diamond films, 303

Wear-life
Controlling and improving the microtribological properties of Langmuir–Blodgett monolayer films using an external electric field, 151
Window
CVD diamond thin film for IR optics and X-ray optics, 297

Xenon gas
Enhanced diamond film growth by Xe-added microwave plasma CVD, 269
X-ray diffraction
The influence of the momentum transfer on the structural and optical properties of ZnSe thin films prepared by r.f. magnetron sputtering, 8
Epitaxial orientation of MBE grown Ru_2Si_3 films on Si(111) and Si(001), 15
Dependence of texture development on thickness of single-annealed-layer in sol–gel derived PZT thin films, 22
Deposition and structural characterization of high quality textured C_{60} thin films, 49
Heat resistance of electron beam deposited Mo/C X-ray multilayers, 80
CVD diamond thin film for IR optics and X-ray optics, 297
4-circle X-ray double crystal diffraction
The content calculation of hexagonal phase inclusions in cubic GaN films on GaAs(001) substrates grown by metalorganic chemical vapor deposition, 237
X-ray reflectivity
Heat resistance of electron beam deposited Mo/C X-ray multilayers, 80

Yttria stabilized zirconia
Influence of oxide mixtures on mechanical properties of plasma sprayed functionally graded coating, 86

Zinc selenide
The influence of the momentum transfer on the structural and optical properties of ZnSe thin films prepared by r.f. magnetron sputtering, 8
ZnSe growth
ZnSe growth by radical assisted MOCVD using hollow cathode plasma, 244
